

OPHTHALMIC Product Guide

A JOBSON PUBLICATION • VOLUME 21 / NUMBER 7

Dear Doctor:

Review of Ophthalmology is pleased to offer you this preview of many exciting new products now available in the ophthalmic marketplace. In the pages to follow, you'll learn about innovative new medications, diagnostic instruments, corrective lens options, in-office laboratory equipment and many other new products. To obtain more information on a particular product, follow these steps:

1. Circle the corresponding number on the enclosed reader service card for each product of interest to you.
2. Fill in your name and address.
3. Return the postage-paid card to us. Educational materials will be sent directly to you by the individual companies.

Thank you for your interest and support!

*Advanced science
in every single drop.*

No Shaking Required.

TOPCON SYNERGY™ ODM OPHTHALMIC DATA MANAGEMENT SYSTEM

The Synergy™ ODM Ophthalmic Data Management System integrates images and reports from Topcon and over 130 other manufacturers' systems into a single, secure, digital environment. With the ability to view, compare, annotate and transmit patient images seamlessly and securely, Synergy™ ODM provides for fluent workflow efficiency and helps the transition to a paperless environment. The web-based system allows for rapid access to patient information, anytime, from virtually anywhere, including workstations and remote computers. Designed as a scalable and flexible solution, Synergy™ ODM integrates with most EMR's, is fully standards compliant and scalable to fit any size practice*Sold separately or as part of a package.

TOPCON KR-1W WAVERONT ANALYZER

The 5-in-1 KR-1W Wavefront Analyzer from Topcon combines wavefront aberration, corneal topography, auto-refraction, keratometry, and pupillometry all in one unit! The system is extremely easy to operate, featuring auto alignment and measurement, a large color touch screen, and invisible light measurement for added patient comfort. The onboard evaluation software with multiple map displays provides valuable pre- and post-op data for cataract and refractive procedures. The system is fully networkable in various configurations.

TOPCON CV-5000S VISION TESTER

The CV-5000S Automated Vision Tester sets new quality standards. The fast lens rotation provides comfort for both user and patient while the compact and contemporary design enhances the doctor's professional image. The CV-5000S provides a complete 21-point refraction and features the KB-50S One Dial Controller with a 10.4" color touch-screen display. Complete connectivity allows data to be sent automatically to every CV system throughout the office and populated automatically into the EMR, making paperless refraction a reality.

TOPCON 3D OCT-2000 SPECTRAL DOMAIN OCT

The Topcon 3D OCT-2000 System is the first Spectral Domain OCT system to incorporate a high-resolution fundus camera and a user-friendly color touch screen display in a compact, space-saving design. The easy-to-use, intuitive FastMap™ software enables dynamic viewing of the OCT data, providing 3D, 2D and fundus images simultaneously. Pin-Point™ Registration properly indicates the location of the OCT image within the fundus image. In addition, the compare function allows users to view serial exams in a comparison view and apply different analytical tools. The seamless integration of the 3D OCT-2000 with Topcon's Synergy™ Ophthalmic Data Management System provides true connectivity and access to images anywhere, anytime.

Octopus 600®

Early diagnosis and standard white-on-white perimetry in one device

The Octopus® 600 extends Haag-Streit's product range of visual field analyzers combining the Pulsar method for early glaucoma detection and standard white-on-white perimetry for long term follow-up in one compact and stand alone device. The instrument is the first visual field analyzer that performs standard white-on-white perimetry on an integrated flicker-free screen, using TFT and LED technology.

Circle No. 29

Reliance FX 920®

Examination Chair

The FX 920 sets a new standard for design but it retains the core value of all Reliance products — rugged durability. All surfaces of the chair are designed to support a patient's entire weight. Ergonomic full power tilt is efficient for the practitioner as well as comfortable for the patient. A full complement of controls is available on both sides of chair and a detached dual footswitch adds flexibility.

Circle No. 32

TONOSAFE® Tonometry Prisms

Speed up Exams. Cut Infection Risk.

Tonosafe® disposable prisms eliminate the risk of cross-infection. They easily snap over the tips of Goldmann applanation tonometers, or Perkins tonometers. The prisms are developed for single patient use and only take a moment to position. Calibrated to Goldmann standards, the Tonosafe is the same mass as the Goldmann prism so no conversion of results is necessary.

KORB MEIBOMIAN GLAND EVALUATOR™

The first standardized metric to evaluate meibomian gland function. The Korb MGE™, by mimicking the pressure of a deliberate blink (0.8 - 1.2 g/mm²), allows the eye care professional to assess meibomian gland secretions and function at the slit lamp biomicroscope. Its use diagnoses inadequate meibomian gland function, the established leading cause of dry eye throughout the world. The Korb MGE™ also tracks the progression of MGD and non-obvious MGD with visit-to-visit consistency and repeatability. For eye care professionals who appreciate the global importance of MGD in maintaining optimal ocular comfort and vision.

LIPIFLOW® THERMAL PULSATION

The first device shown in a large multi-center, randomized, controlled clinical trial to significantly unblock glands, allowing them to resume natural function. LipiFlow® is an in-office procedure targeting the primary root cause of dry eye using patented Vector Thermal Pulse VIP™ technology. Precisely directed heat raises the temperature of the glands to a therapeutic level while the insulated design protects the cornea and globe. Simultaneously, LipiFlow® applies pressure in a phased peristaltic pattern of 100 unique expressions for 12 minutes to remove obstruction and evacuate stagnant, potentially necrotic, cells from the meibomian glands. For eye care professionals who wish to effectively treat MGD, and by intervening in the resulting cascade, improve ocular comfort and vision.

REVIEW[®] of Ophthalmology

ENRICH YOUR PRACTICE

Review of Ophthalmology delivers current and comprehensive information focusing on topics such as disease diagnosis, surgical techniques and new technologies.

The *Review Group's Ophthalmic Product Guide* brings you the latest products and technology on the market. Published every February and July.

The *Review Group* also distributes a variety of supplements, guides and handbooks with your subscription to *Review of Ophthalmology*. These publications are designed to keep you informed on what's new and innovative in the industry on topics ranging from cataract refractive surgery to ocular surface disease.

The *Review Group* also offers valuable continuing medical education sessions in both print and online formats, allowing a convenient way for you to earn CME credits. In addition, we also offer an impressive fleet of free e-newsletters—such as *Review of Ophthalmology Online* and *Review of Ophthalmology's Retina Online*—so you can keep up to date on breaking news and the latest research.

The *Review Group* also spearheads meetings and conferences, bringing together experts in the field and providing a forum for practitioners that allows you to educate, and learn from others in the profession. These meetings cover a broad range of topics in the form of educational or promotional roundtables and forums.

OCULUS PARK 1® (PACHY+AUTOREF+KERATOMETER)

Put your practice in overdrive with the OCULUS PARK 1®, the only diagnostic instrument to combine an Auto-Refractometer with a non-contact Pachymeter and a Keratometer, all in one. Sleek, slim, ergonomically designed and attractively priced, the PARK 1® uses proven, cutting-edge Scheimpflug technology. EMR ready.

OCULUS PENTACAM®

Complete examination of the anterior segment is now more affordable with the OCULUS Pentacam®. In less than 2 seconds, the Pentacam® provides the topography and elevation maps for the front and back surface of the cornea and non-contact pachymetry data. Additional software modules provide Anterior Chamber Depth (ACD), chamber angles and volume information, early Keratoconus detection capability and more. EMR ready.

OCULUS IMAGECAM® 2 SLIT LAMP CAMERA

This small, affordable, high-quality camera and beam splitter can adapt to most mainstream slit lamps in the marketplace. The OCULUS ImageCam® 2 is capable of capturing live videos and digital photos. Anterior and Posterior imaging capacity allows for an extremely high return on investment, maintaining high resolution photo documentation for managing many different pathologies. EMR ready.

TOPCON PASCAL® STREAMLINE™ & SYNTHESIS™ PATTERN SCANNING LASERS WITH ENDPOINT MANAGEMENT™

The Topcon PASCAL® Pattern Scanning Laser Systems are renowned for their precision, ease of use and enhanced patient comfort. The PASCAL® method of photocoagulation allows physicians to control the precision, safety and efficiency of the laser procedure, while optimizing patient comfort and convenience. Topcon offers the PASCAL® Streamline™ Laser Photocoagulator and the PASCAL® Synthesis™, Topcon's premiere dual-port pattern scanning retinal laser. All systems are available in both 532nm and 577nm wavelengths. The optional Endpoint Management™ software with Landmark Patterns™ allows for less-damaging sub-threshold treatment of a variety of retinal disorders.

TELLER ACUITY CARDS® II

Features Include:

- Clinically validated
- Digitally printed test cards
- No edge artifacts

Proven Features still include:

- Meets AOA guideline for infant vision testing

Testing Formats Available:

- TAC II Full set: 16 cards (from 20/3200 to 20/30)
- TAC II full and half set (from 20/3200 to 20/30)

RetnaGene™—a highly accurate and comprehensive risk assessment for advanced AMD

RetnaGene™ is a portfolio of laboratory-developed genetic tests that advances AMD risk assessment.

RetnaGene™ AMD: Assesses the risk for CNV within 2, 5, and 10 years in patients age ≥55 with early or intermediate dry AMD.

RetnaGene™ LR: Assesses the lifetime risk for advanced AMD (wet or dry) in patients age ≥55 and/or in patients with a family history of AMD.

For more information call **1.855.MY.NICOX** (1.855.696.4269) or visit www.myNicox.com/RetnaGene.

No test is perfect. The RetnaGene™ AMD and RetnaGene™ LR laboratory-developed tests are highly accurate, genetic tests. However, erroneous results may occur in rare cases. The RetnaGene™ AMD and RetnaGene™ LR laboratory-developed tests were validated under federal laboratory guidelines by Sequenom Center for Molecular Medicine, dba Sequenom Laboratories, a wholly owned subsidiary of Sequenom, Inc. The tests have not been cleared or approved by the US Food and Drug Administration (FDA). Although laboratory-developed tests to date have not been subject to US FDA regulation, certification of the laboratory is required under CLIA to ensure the quality and validity of the test. Sequenom Laboratories is CAP-accredited and CLIA-certified to perform high-complexity clinical laboratory tests. AMD=age-related macular degeneration; CAP=College of American Pathologists; CLIA=Clinical Laboratory Improvement Amendments; CNV=choroidal neovascularization.
